Table 2: Hours Logged

Date	Hours	Activity
2025-05-09	1	Made some small changes and rerendered site to make sure everything is up to date.
2025-05-13	1	Added Carsten's edits to the first background section of the website. Planned for a more efficient way to manage the publication metadata to make it easier to add new pages.
2025-05-14	1	Pushed new probe overview/background section to the deployed site. Started looking at the mass spec overview to see where it needs to be updated.
2025-05-28	2	Received data from Zhongwu Guo and began putting into new page of website - data is excellent but converting the accession numbers to gene names is weirdly challenging.
2025-05-29	1	Figured out how to get (most of) the gene names! Still have some wrangling and formatting to make the new page complete.
2025-05-30	2	Added the new page to the site & went through my checklist and made sure that all the links work properly. A new weird problem is that my GO search appears broken somehow...
