Table 2: Hours Logged

Date	Hours	Activity
2025-06-11	2	Received comments on bioinformatics manuscript - need to do a ton of work! Started by going through and isolating the wrangling script I used to prepare each dataset for SK_2024 and WY_2021. I may paste these scripts back in to the main page so users can preview the steps taken to wrangle the results into my format.
2025-06-16	2	As on the 11th I spent a while re-working the wrangling script I had for the DCC_2025 data - this will help address the reviewers' concerns that the data wrangling wasn't clear. Also adding back the accession numbers as recommended by a reviewer.
2025-06-17	2	Updated Shiny app (probe vs probe comparison page) with the PDAA data from WY 2021 with Jeremy Baskin's data. Also continued arranging the data wrangling pages to include every step taken.
2025-06-25	1	Only had a little time
2025-06-26	2	Working on cleaning up the first few lipid probe pages to include the accession numbers in the data table and in the downloadable table.
